Tagbilaran City, Bohol,
Philippines

My Profile

I am a student specializing in Java development, building my skills through coding projects and a strong focus on object-oriented programming. Alongside this, I work as a Canva Graphic Designer creating engaging visuals for social media and branding, while continuously growing in both technical and creative areas with a commitment to quality and professionalism.

Education

2023–Present

University of Bohol

Bachelor of Science in Computer Engineering

Computer engineering students learn how to integrate hardware and software components to create innovative solutions for a wide range of applications, from embedded systems and mobile devices to large-scale computer networks and data centers. The curriculum often includes hands-on projects, internships, and opportunities to work on real-world problems to prepare students for careers in areas such as software development, hardware design, system integration, and cybersecurity.

Experience

2024–2025

Cafe Barcode Scanner

Software Design

We created an application Cafe Barcode Scanner using Java. We used MySQL Database and libraries for the design such as Swing and JavaFX.

2023–2025

Gospel Light Baptist Church

Graphic Designer

We made posters and promotional videos of the successful IBMA Bohol Church Camp 2023 and 2025.
